ACADAMIC PROJECTS:

Mini Project Title: Online Toll Gate Payment System

Language: Java

Description: Online Tollgate Payment System helps the travelers to pay the toll amount. It's mission to work on the construction of a project which reduces the manual work in the toll booth. This will allow the vehicles to pass through the booth without stopping and as a result reducing the traffic gathering at the toll collecting booth

Main Project Title: Digital Automation Payment

Domain: Machine Learning

Description: Toll Gate Automation which is a step towards improving the tracking and monitoring of vehicles. In this system, a computerized system automatically identifies an approaching vehicle and records the vehicle number and time. If the vehicle belongs to the authorized person and group, it automatically opens the Toll Gate and a predetermined amount is automatically deducted from its account
